Subject: Computer-based ELPAC: Technology Readiness Checker for Students (TRCS) Focus Group

Dear LEA ELPAC Coordinator:

Educational Testing Service (ETS), under direction from the California Department of Education (CDE), will hold virtual focus groups to collect feedback on the [Technology Readiness Checker for Students](#) (TRCS). The TRCS is an optional interactive online tool that can be used to evaluate whether a student may need technological support in taking the online assessment, such as through a technology navigation assistant—a universal tool—or designated interface assistance—a designated support. For more information, please refer to the instructions in the [How To Use the Technology Readiness Checker for Students](#) web document.

To better understand how this tool is used by educators regarding students' technological familiarity with online interactions, we invite you to participate in an optional TRCS focus group. To volunteer for this optional focus group, please complete [this online interest form](#) by **Tuesday, November 26, 2019**. These meetings will take place during the first and second week of December from 3:30 to 4:30 p.m. to accommodate most educators' schedules.

[Complete the Interest Form Now!](#)

Direct questions about the computer-based ELPAC field test to the California Technical Assistance Center (CalTAC) by phone at 800-955-2954 or by email at caltac@ets.org.

Sincerely,

California Technical Assistance Center
