Subject: ELPAC Resolved -- Known Issue for iPad Users: Computer-based Summative ELPAC Audio Files in the Form 2 Listening Test

Notification of Issue Resolution

Dear LEA ELPAC coordinator:

Beginning with this 2019–2020 administration, the Summative English Language Proficiency Assessments for California (ELPAC) is delivered by means of a computer-based test delivery platform.

Students being administered the kindergarten, grade two and grades three through five Listening domain, form 2, on **iPads** might have had audio for an item that was incorrect or missing. This known issue was identified on February 7, 2020; LEA ELPAC coordinators were informed, via email, on February 7, 2020.

This issue has been resolved. Students taking the kindergarten, grade two, and grades three through five Listening domain using iPads will hear the correct corresponding audio file. For more information and updates, view the [ELPAC Known Issues Log](#) web page on ELPAC.org.

Any questions about the administration of the Summative ELPAC can be directed to the California Technical Assistance Center (CaTAC), by phone at 800-955-2954 or by email at caltac@ets.org.

Sincerely,

California Technical Assistance Center
Educational Testing Service
